WORK EXPERIENCE

FullStack Developer Intern

Jan 2026 - May 2026

Mb Phillippines Inc. - Core Banking System (mbphils/icbs17c)

- Contributed to the development of a core banking system by implementing and refining end-to-end transaction workflows, including general ledger and financial postings, ensuring accurate processing and handling of edge cases
- Refactored application architecture by moving logic into service layer components with transactional control, improving system reliability and maintainability
- Built and executed automated test scripts (Groovy, SQL, Shell) to validate transaction workflows and ensure data accuracy across scenarios
- Designed and maintained PostgreSQL scripts and database structures, supporting transaction processing, data consistency, and system validation

Freelance / Part-Time

Mar 2025 - Present

Data Entry Specialist - DAGAZ HR CONSULTANCY AND RECRUITMENT COMPANY

- Managed and processed order dispute cases across Uber Eats and UK-based multi-platform systems supporting multiple restaurant branches
- Investigated transaction issues, and resolved disputes to ensure accurate financial reconciliation
- Handled high volumes of data using Excel and database tools, maintaining consistency and data integrity
- Coordinated with internal teams to track order discrepancies and improve dispute resolution workflows

PROJECT

Stride – Offline Productivity & Finance App | React Native, Expo Router, TypeScript, and SQLite

- Developed features for task management, note-taking, and financial tracking (income, expenses, savings, interest accrual) with structured local data handling
- Implemented biometric authentication and secure token storage to protect sensitive user data
- Architected a scalable local first data layer with schema migrations and audit logging, improving data reliability and maintainability

FixIt - Job Matching Platform for Blue Collar Worker | React, Node.js, Express, and MongoDB

- Developed a full-stack web application using for connecting clients to blue collar workers
- Designed and implemented RESTful APIs for authentication, service listings, and booking workflows
- Built a non relational database schema to manage users, services, and transactions efficiently

Where's My Coffee? – Location-Based Mobile App | Ionic Framework, Angular and SQLite

- Built a mobile application integrating maps and location services to help users discover nearby cafés
- Implemented features such as user reviews, ratings, and dynamic shop listings
- Designed a clean and intuitive interface to improve user navigation and engagement

Technical Skills:

- **Languages & Frameworks:** Java, Groovy, JavaScript, TypeScript, PHP, Grails Spring Boot, React.js, React Native, Node.js, Express.js, Ionic
- **Databases & Persistence:** PostgreSQL, MySQL, SQLite, MongoDB, GORM
- **DevOps & Utilities:** Git, Gradle, Postman, JasperReports, Expo Router
- **Professional Competencies:** System Architecture, Transaction Processing, Test Automation, Data Analysis, Technical Documentation, API Design

Certificate:

Certiport - IT Specialist - Database

Dec 2025 - Dec 2030

Education:

Nueva Ecija University of Science and Technology

Bachelor of Science and Information Technology

- Specialization in Database System Technology (2022 - 2026)
